

Cookie and Similar Technologies Policy

Version: 1.0

Effective date: 25 September 2026

Last updated: 25 September 2026

Controlling language: Français / French / Frans

The French version is controlling. In case of any discrepancy between language versions, the French version prevails unless mandatory law provides otherwise.

Sommaire / Inhoud / Contents

1. 1. Scope
2. 2. Categories
3. 3. Technologies currently planned/used
4. 4. Consent
5. 5. Stripe and third parties
6. 6. PWA cache and private data
7. 7. Updates to the list

1. Scope

This Policy explains cookies, local storage, consent identifiers and service-worker/cache mechanisms used by SCT WebCare 360. It supplements the Privacy Policy.

2. Categories

- Necessary: session, security, CSRF, authentication, consent-choice and essential functionality. Strictly necessary technologies may be used without consent.
- Preferences: language and interface settings. They are not used for advertising unless separately disclosed and consented.

- Analytics: non-essential audience measurement, activated only after consent if such a tool is actually deployed.
- Marketing: advertising pixels and cross-site tracking, activated only after consent if actually deployed.

3. Technologies currently planned/used

Name / technology	Category	Purpose	Target duration
PHP session cookie	Necessary	Authenticated session; HttpOnly, Secure on HTTPS, appropriate SameSite	Session / technical session duration
cookie_consent_id	Necessary	Remember and evidence cookie choices	Normally max. 6 months before renewed choice
trusted_device	Necessary / security	Remember a trusted device after stronger authentication	Up to 30 days
preferred-language (localStorage)	Preference	Remember interface language	Until changed/removed; limited to functional need
Service Worker / Cache Storage	Necessary technical PWA	PWA operation and public-resource caching	Technical rotation; private APIs/data must not be cached
Stripe Checkout / Customer Portal	External payment necessity	Fraud prevention, payment and customer portal on Stripe domain	According to applicable Stripe rules

As of the effective date, Google Analytics, Meta Pixel, TikTok Pixel and LinkedIn Pixel must not be active unless this Policy and the consent mechanism are updated first.

4. Consent

Non-essential cookies are used only after freely given, specific, informed and unambiguous consent. Rejecting must be as easy as accepting. Consent is not inferred from silence, continued browsing or general browser settings.

Choices can be withdrawn or changed at any time through Cookie Preferences. The preference should normally be remembered for no more than six months before asking again, in line with Belgian Data Protection Authority guidance.

5. Stripe and third parties

When a user enters Stripe Checkout or Customer Portal, Stripe may use its own cookies for security, fraud prevention and payment processing. Stripe technologies are also governed by Stripe's

information. The Platform does not intentionally load Stripe marketing cookies on its own pages without a lawful basis.

6. PWA cache and private data

The service worker must not cache authentication responses, private panels, private APIs, session data or non-public business content. After logout, the interface must promptly show the logged-out state.

7. Updates to the list

The actual list is reviewed whenever a new third-party tool is added. If analytics or marketing technologies are introduced, the banner, preferences and this Policy must be updated before activation.
